A Note for Next Year's TA

Dear Future TA,

I hope this note finds you well. I wanted to share an observation to help with planning next year's sessions.

To maintain consistency with the lectures, it might be a good idea to separate the data visualization topic into two recitation sessions: **visualization I** and **visualization II**. I only realized this in Week 5 this year. As a result, I ended up having no material to cover during the first recitation class in that week.

Additionally, it seems that Question 2 in the `week4_ds_recitation_data_viz_1.rmd` file is more suited for the visualization II session. If you could modify the R Markdown file accordingly, it would ensure a smoother experience for both you and the students.

Thank you for your attention to this, and best of luck with your teaching!

Best,
Lu Qiu
